X. Intl Congress Microbiology/Mexico

---

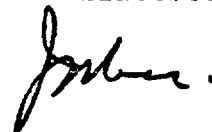

~~xxxxx~~ This meeting will be held August 9-15.  
I enclose a letter I received from Heden,  
which you may already have.

Did you mean Mike (E.M.) Foster rather than  
Porter as one of the US members? We may  
have trouble with him more from the other  
side; his position is likely to be close  
to that of Dennis Watson's, whom he knows  
even more closely (personally and profes-  
sionally) than I do from years back. How-  
ever I have not seen him in 10 years, and  
he may be less hawkish about BW than before.

He will however tend to polarize Luria, I am  
sure. But Heden will be there too and he knows the score.

In view of the timing, I plan to call or  
write Luria next week. I can copy most of  
what may be needed from the material already  
received. If there is a brief (one or two  
page) fact sheet summarizing the present US  
diplomatic position, that would be the most  
helpful addition.

Sincerely,

8/4/69
